

PerformX™ html Transit

Author

Rapid Documentation Development

- Select the Author template for a particular content category.
- Accept the detailed content standard, or configure the optional elements for document specific requirements.
- Generate a new document; add text, tables, graphics, formatting and hypertext links with a standard toolbar.
- Save the document into the nominated Network directory ready for publishing and posting by HTML Transit.

Publish

Instant Conversion and Publishing

- Configure a project in HTML Transit that specifies the documents to be included in a particular collection.
- With Transit Central you can specify a directory so Authors can simply drag and drop to publish.
- Apply a Transit Template to customise output for corporate frameset, presentation, graphics and navigation.
- HTML Transit converts the source documents and publishes in HTML or XML.

Post

Automatic Scheduling and Posting

- When documents change you can update the site by merely pushing a button in HTML Transit.
- HTML Transit automatically posts the results to your site.
- HTML Transit templates can apply JavaScript or ASP and modify output for Intranet, Extranet and Internet.
- With Transit Central you can schedule updates to happen automatically, on an hourly, daily or weekly basis.
